MOLAB RECEIVES THIRD ROUND OF FUNDING FROM

ALL POINTS NORTH FOUNDATION

MoLab expands solar science education to twelve Title 1 middle schools in Leon, Gadsden, and South Georgia Counties!

[Tallahassee, FL, January 27, 2026] – Building on its successful partnership with [All Points North Foundation](#), MoLab expands its hands-on solar science experiences to benefit twelve Title 1 middle schools in Florida and South Georgia. The MoBus Solar Science Sustainability Lab will educate sixth grade students about sustainable practices and the importance of solar as an alternative renewable resource. The project will assist in meeting All Points North Foundation’s vision that everyone should have equal opportunity and access to realize their “true North” – place of achievement.

Through MoLab’s custom-created curriculum, students will participate in a series of hands-on, project-based solar education programs that will focus on circuitry, solar cell technology, and the connection between energy and all living things. MoBus will be an effective tool to explore solar sustainability in a fun, welcoming setting that encourages discovery, play, and inquiry.

As part of this project, MoLab will also offer summer camp scholarships for twelve middle school students who previously participated in the spring solar science programming. These students will participate in an immersive week in solar robotics and take a field trip to a solar farm.

Mission: To provide on-the-go dynamic hands-on and inquiry-based science experiences through a mobile laboratory that promotes discovery.

Vision Statement: To provide resources that cultivate and inspire a greater understanding of the role of sciences in our world.

Philosophy: Based on equal access to hands-on science education and expertise - creatively and positively impacting those we serve.

A COPY OF THE OFFICIAL REGISTRATION AND FINANCIAL INFORMATION MAY BE OBTAINED FROM THE DIVISION OF CONSUMER SERVICES BY CALLING TOLL-FREE (800-435-7352) WITHIN THE STATE. REGISTRATION DOES NOT IMPLY ENDORSEMENT, APPROVAL, OR RECOMMENDATION BY THE STATE.

MoLab Founders Aimee Hills and Trish A. Hanson are pleased to expand their relationship with All Points North Foundation. It reinforces the joint commitment to provide unique, hands-on solar science experiences for the benefit of the children in Leon Gadsden, and South Georgia Counties. MoLab's project-based programs provide resources that cultivate and inspire a greater understanding of the role of science in our world and are based on equal access to hands-on science education and expertise – creatively and positively affecting those MoLab serves.

ABOUT

MoLab

The science-to-go format allows MoLab to serve a broad, diverse audience over a large geographical region, both in rural and urban environments. MoLab's effectiveness in serving science educators and students has no limits or boundaries. Although based out of Leon County, MoLab's services and programs positively impact a wide territory. For more information contact, Trish A. Hanson at trish@tallymolab.org.

All Points North Foundation

All Points North Foundation was founded in 2011 by a private family who believes passionately that everyone has a "true North" – a place of achievement – and that everyone should have equal opportunity and access to realize their goals. All Points North Foundation funds grantees in two areas – public middle school education (grades 6-8) and solar energy – that have the power to help communities nationwide navigate upward. For more information, visit allpointsnorthfoundation.org.
